RE: GS1net Certification Program

Dear Phil,

GS1 Australia would like to formally confirm that Bryn Systems has successfully completed all of the GS1net Certification Requirements for Phase 2 of the program (Grocery Only). This result has highlighted the ability of the PCM Adaptor to successfully populate data on GS1net by PCM users.

As you know, there are outstanding items from Phase 1 of the GS1net Certification Program which have not been successfully completed; namely

1. PCM references EANnet error codes and error descriptions, including EANnet field ID's and field names, which are not overridden by the Bryn PCM Adaptor. GS1net Certification requires all error messages, both visual and report based, to reference GS1net error codes and error descriptions. Where applicable, error descriptions to refer to GS1net field names.
2. PCM generates a number of error messages that are valid EANnet rules but are no longer supported as part of the GS1net Rule set which are not overridden by the Bryn PCM adaptor.
3. The Bryn PCM Adaptor is unable to validate hierarchy or 'whole of catalogue' rules. The Bryn PCM Adaptor validates the PCM output message without reference to the source catalogue.
4. A number of GS1net rules cannot be highlighted by the PCM Adaptor. Post PCM Adaptor processing (which may include additional message validation) has not been included as part of the GS1net Certification process.

Based on the above, GS1 Australia is unable to grant GS1net Certification to the PCM Adaptor (even though Phase 2 tests the show the system is able to populate data onto GS1net successfully) as we must protect the integrity of the GS1net Certification Program based on the full definition of the program and ensure consistency of functionality across all GS1net Certified Products.

However we do recognise that the Bryn PCM Adaptor does provide an avenue for PCM users to address the GS1net Migration requirements, and provides a solid platform for users to upgrade when Bryn Systems further develops their solution.

We look forward to continuing to work with Bryn Systems towards full Certification and thank you for your support and the effort of the Bryn System's team to get to this stage.

Kind Regards,
